

Change amendment to constitution.

I propose that the committee post of steeple keeper be created, this is due to the fact that the bells have lacked general maintenance over the last two terms. The post will be responsible for general maintenance of bells and fittings. A small set of tools shall be aquired, namely two ajustable spanners, a brace and bit, and a small plane, these tools I consider to be the minimum required to replace a stay.

The post should be a committee post as we have a large enough membership at the moment to entail having five committee members, this will aid comunication between members and committee and provide more ideas for the society,

Proposed.
